## TURNKEY PRINT SOLUTIONS

incjet  
PROBLEM SOLVED

## Turnkey, industrial print solution for reliable performance

The 1/2" .UNO packaging printer's all-in-one print head and screen give you a simple, yet incredibly powerful way to print up to 1/2" of print with the minimum of effort. This packaging printer system comprises of a 7" screen and attached print head allowing you to be up and running within minutes.

Using inc.jet's proven and highly reliable print solutions based on Hewlett-Packard technology, the .UNO packaging printer is the ideal product for serialization, barcodes and human-readable printing in all packaging applications.

- **Single 1/2" Print Head**
- **7" Touch Screen (with Design and Management software)**
- **All in one turnkey packaging printer solution replacing messy CIJ Printers**
- **Rugged industrial design for the most demanding installations**
- **No Mess, No Maintenance, No Stress technology**
- **Ideal for lot codes, expiry date applications**

## 8 Reasons to Replace your CIJ Printer

An inc.jet .UNO print solution can help you to replace your troublesome CIJ Printer and here's why...

1. No Mess
2. No Smell
3. Zero maintenance
4. Higher reliability
5. Lower Costs
6. Simple operation
7. Lowered VOC's
8. Small Footprint

## Print Specifications

### Print Resolution

- 600 dpi x 300 dpi      250 feet per minute
- 300 dpi x 300 dpi      500 feet per minute
- Print Density            User configurable

### Barcode Capability

- Static: 87 Types
- Dynamic 9 Types

### Other Printable items

- |               |                            |
|---------------|----------------------------|
| Lot Codes     | Date/Expiry Date           |
| Shift Codes   | Foreign Languages          |
| Bitmaps/Logos | Fixed Text                 |
| User Inserts  | Counters and Batch Numbers |

## Expanded capabilities for greater flexibility

Building on the simplicity of a single pen .UNO with a 7" screen and UI, there is now a way to attach up to 4 pens and a stack light– the .UNO Plus.

The ability to print on multiple sides of a package means that you can take two printers and replace them with one, saving you money and complexity. The individual pens can be joined together and print up to 2" if required.

## A true Lifetime Warranty

A guarantee of reliability is what your business needs today. And a company to stand behind its words.

inc.jet does just this by offering a genuine Lifetime Warranty on its hardware. If there is ever a problem, we will replace it free of charges for the lifetime of that product, whether 1 year or 20 years from now

## Lowest Total Cost of Ownership

Operational Costs can often be far greater than the initial purchase price taking into consideration costs on consumables, reliability, maintenance and other concerns.

With Zero Maintenance, superb control over print resolution and densities, proven reliability with the lowest downtime possible, the .UNO and .UNO Plus, matched with inc.jet's Managed Inks, gives solid performance at the lowest costs possible.

- **Up to four 1/2" Print Head separated or joined together to form a maximum of 2" of print width.**
- **7" Touch Screen (with Design and Management software)**
- **Optional Stack light connectivity**
- **Small form fit and print footprint for inclusion in most applications**
- **Ideal for Form Fill Sealers up to 4 lanes**

# Inks for All Applications

## Prime X (1953423M)

PrimeX was designed to take the next stage in printing on non-porous substrates. It is ideal for use with a wide variety of plastics, metals and even glass. The solvent based formula dries rapidly on many difficult substrates and has an excellent decap time.

## Solvent X Plus (1953496M)

Solvent X Plus takes the next step and has a noticeable improvement over Solvent X for especially difficult substrates.

## TSD 1010 (1953524M)

The next step forward in solvent inks, offering greater decap and recovery, plus simpler and more consistent performance in the production environment.

## Carton Black Plus (1953339M)

Carton Black is an excellent all around ink, especially for printing on corrugate and other porous substrates. It has excellent decap characteristics together with excellent waterfast capabilities. It consistently gives very good print quality.
